second time late on Sunday, once all the teams are established. [BUY IT NOW](#) .

2. Again - you select the eight winners from the first round, then you select the two Cup finalists, then you click "GO". The list will sort automatically for you, with notes on what is going on with these guys (dark horse, injuries, etc. - it will all be there). Need more info? [CLICK HERE](#)

3. Dobber's guarantee: If you correctly choose six of the eight teams that make it to the second round and correctly choose both Stanley Cup finalists...and use this list, you will win. I guarantee that, or I'll refund your money. \$7.75. [BUY IT](#)

4. Some things you need - make sure I'm on your safelist (dobber@dobberhockey.com), make sure that when you pay via PayPal you use a CURRENT email address. Every time, there's always a few people who give an outdated email addy and then email me frantically for a list that I already sent them. You also need MS Excel - with macros allowed. If you don't, you can email me with your picks, I will pick them for you, and email you the list that is generated. I can't do this a million times, so I will only do it once per person.

PS - this list has an option to also add goaltenders to your list. Awesome!
